Acknowledgements

I would like to thank Dra Susanna Cueva and Dr. Santiago Alban for the large amount of work they did in organising the courses, and Dr. Juan Carlos Duarte for leading the courses each day. I would also like to thank all the visiting instructors from many countries in Latin America who came significant distances to teach and run two excellent courses.

In addition the very generous hospitality of the local organisers was overwhelming. It played a major part in allowing those taking part to meet and talk outside the strict timing of the course.
